

BENCH REVISION A / CANONICAL SINGLE-SHEET SCHEMATIC

01 THROUGH POWER

05 REPORTING USB

Canonical source: power-widget-bench.kicad_sch. Previews exported directly by kicad-cli.

Edit the native schematic. Do not rebuild it from a documentation diagram.

NATIVE KiCad / 82 physical components / 65 named nets / one sheet

Dot = junction. Undotted crossing = no connection. Comma-separated pins share a net. Cross = deliberately unconnected pin.

Each physical component appears once. Both grounds remain separate. Engineering draft; not qualified hardware.
